ABOUT ME

As a QA Engineer with a background in economics, I have wide approach to software quality assurance, especially in a business process-related applications. I have the analytical skills to identify potential problems and propose effective solutions. I can better understand the end-user perspective, the financial losses of software defects and the overall impact on business operations.

I can plan the testing process, write detailed bug reports and communicate the results to both technical and non-technical stakeholders.

I am passionate about discovering everything new in the ever-changing requirements of QA engineering.

As a QA engineer I want to take part in the development of innovative products and technologies as well as help to create and develop a high-quality and reliable products. I am ready to become a part of a team of professionals where I can find the best opportunity for exchanging knowledge and experience.

MY WAY

QA Engineer

SPLOTEAM- a web application for organizing sports games. Since May 2024

Testing a web application for organizing sports games among the population. Planning and documenting the testing process and describing bugs, analyzing and making proposals to improve the functionality.

In 2 months, I found 3 bugs that were a priority for product development, which were filed, documented, and subsequently fixed by the development team.

QA Engineer and Data Analyst

HOLLYBOOT- a web application for shoe store. 2022- 2024

Helped to organize the ordering process to speed up and minimize mistakes. Planning and documenting the testing process and describing bugs in a Google workspace, analyzing interests of buyers, suggesting ways to improve the usability of the application to increase demand. Increased sales by 30% in a year, raised the store rating by 0.5 points.

Freelance

2012- 2016

I have skills in working with Adobe Photoshop, Adobe Lightroom. A family, fashion and product photography.

Data Analyst

SBERBANK- big bank. 2007- 2012

I worked with the large volumes of information to analyze business and assess the risk of client lending. The plan was fulfilled for 120%, attracted more than 40 enterprises for lending, my credit case was the least risky.

EDUCATION

JUNEIT

Automation Testing Course. September 2024- October 2024

QA Manual Course / REST API. May 2024- September 2024

Training with the internship on the project CleanMe.

**Moscow State University of Economics, Statistics, and Informatics.
2002-2007**

Diploma with honors

Specialist economist specializing in banking.
Analysis of financial statements of enterprises.
Accounting.

Dear Recruiting Team

Through many years of experience working with different applications I successfully noticed lot of errors. Which could cause problems such as troubles with the platforms, shut-downs of applications, videos what preventing me to use the main operations. As a result the business might suffer and customers could loose a convenient order platform and trust in this organization. I realized, that to avoid this, we need to be careful and competent not only when creating, but also when testing products.

That's why I decided to change my field of activity and to move into the IT industry, where my experience and analytical mind can be useful and software testing becomes my main job. Through API testing I am already familiar with JavaScript and I am very interested in test automation.

I am ready to invest a lot of power and time in additional studying. I love learning and I want to be a part of modern life, new technologies. I want to be a part of the creative international team, to grow up like a specialist .

Considering my experience with web applications, my education and existing skills, I am sure that I can contribute to the success of your company.

Sincerely,

Oxana Kachalova
